## Q:What do dentists do?

A: Dentists provide a **SERVICE** to people by helping them keep their gums and teeth healthy. If your teeth are not healthy like if you had a **CAVITY** in your tooth they will fill it so your tooth won't fall out. Dentists also polish teeth which helps you with **ORAL** health. Dentists help by taking out unhealthy teeth. They try to prevent gum diseases. A Dentist will **encourage** patients to practice good dental care by brushing and flossing their teeth.

# Q:What do dentist use?

A: Dentistes use tools like dental floss, a mouth mirror, toothbrush, explorer, chisel and a scraper.They use dental floss for cleaning in between teeth. A scraper and a chisel are used to scrape **plaque** of your teeth. A mouth mirror helps the dentist to see your whole mouth, like the back of your teeth better.

# Q:How do you become a dentist?

It will take 4 years of college and 4 years of dental school to become a dentist. In dental school you will learn how to do stuff that you do when you are a dentist.

Here is a fun fact--In the USA we buy 14 million gallons of toothpaste every year!

# Q:How long have dentist been around?

Dentists have been around for hundreds of years.Dentist long ago did not have tools and technology like we have today. Here is a fun fact: dentists long ago used hippo teeth for dentures

# Glossary

**Cavity**=something that happens to your teeth when you do not brush them really good.

**Oral**=your teeth or gums.

**SERVICE**=something that someone does for the community.
