Q. What does a doctor do?

A. First, a doctor keeps you **healthy**. A doctor can also do **surgery**. Another thing that a doctor can do is research to try to stop disease. A doctor gives you shots to keep you healthy. A doctor wouldn't give you a shot for no reason. Shots can stop you from getting a **disease**

A picture of a disease.

Q. Is a doctor giving a good or a service?

A. A doctor is giving a **service**. A doctor is giving a service because a doctor keeps you healthy. But also a doctor is a service because you can't hold a doctor and a **good** is something that you can hold.

A picture of a good.

Q. How do you become a doctor?

A. First, you become a doctor if you take 4 years of undergraduate school. Becoming a doctor involves years of training. But also becoming a doctor is not that easy because you have to learn a lot of stuff for many years. It takes 11 years in all to become a doctor.

Fun Fact: The very first women doctor was Elizabeth Blackwell. She was born in February 3, 1821.

# Glossary

Disease-Another word for virus.

Good-Something you can hold.

Healthy-To be clean and not to be sick. So that means not to have any disease.

Service- A person who does stuff for you.

Surgery-Someone trying to fix a injured body.
